

## FIT2101 – Sprint 2 Retrospective Meeting

Attendees: Ayesha Ali, Shreya Kathuriya, Ryley Angus, Akshith Patil

Time: 2:40 PM, Sunday September 29, 2019

Item Description	Duration
Time Estimation: We had picked up a lot of user stories for this sprint given that we had incomplete a few user stories from our previous sprint. We had assigned 2 weeks for this sprint which was not enough to complete all our user stories. We could have chosen fewer user stories so that we could complete all of them.	10 mins
Test Documentation: Whenever a user story is tested, the testing type and other details related to it has to be documented on Google Drive or Asana.	10 mins
DoD: Whenever one of us completes a feature it must compared with the DoD in the PMP and the comparison must be documented on Google Drive or Asana.	5 mins
Burndown Chart: A burndown chart must be created to show the number of user stories done and those that are remaining in a sprint along with the team's process(velocity). For now, this aspect will be given less focus as our focus is mainly on finishing the user stories.	10 mins
